

Environment Policy

Operative Date: 8 June 2023

AGIG's vision is to be the leading gas infrastructure business in Australia by delivering for customers, being a good employer, and sustainably cost efficient. Environmental and social responsibility is a key element of our vision.

Environmental stewardship is critical to the success and sustainability of our business and also a key focus of our Environmental, Social and Governance (ESG) program.

AGIG believes all incidents are preventable and is continually striving to achieve Zero Harm.

Our objectives are to:

- Conduct environmentally responsible operations and minimise environmental impact wherever possible.
- Align our carbon emissions footprint with national and state policy and regulations.
- Provide resources and support to meet our emerging ESG targets.
- Create a culture and environment where every employee is personally committed to managing impacts to the environment.

We will achieve our objectives by:

- Embedding environmental considerations into business decisions and processes
- Promoting environmental awareness and fostering a culture of respect for ecological values.
- Effectively consulting and engaging with our employees, contractors, customers, and key stakeholders on environmental matters
- Establishing an escalation mechanism for environmental matters requiring management intervention.
- Driving a culture where employees and contractors take ownership and are accountable for environmental performance.
- Developing processes and systems to identify, assess and control environmental risks and to ensure the management of risk to as low as reasonably practicable.
- Establishing and maintaining pragmatic and flexible environmental management systems that are tailored to our risks, drives achievement of our vision and are regularly reviewed for currency, relevance and effectiveness.
- Allocating the appropriate resources and providing the necessary information, instruction, training and supervision to enable implementation of the environmental management systems.
- Setting a clear low carbon strategy for the business to decrease carbon emissions.
- Diversify strategies to proactively deliver on low carbon strategy.
- Effectively reporting, recording and investigating environmental incidents and near misses in the workplace and taking proactive measures to prevent recurrence.
- Maintaining preparedness to respond promptly to environmental incidents to mitigate the nature and scale of unintended impacts.
- Setting, monitoring and communicating meaningful performance measures to drive continuous improvement.
- Continually review and improve our performance and target setting within our ESG program.

- Regularly auditing our operations to monitor compliance with statutory obligations and conducting accurate and transparent reporting on any findings.
- Complying with all applicable laws, regulations and standards for the protection of the environment.
